Important Information

The value of investments, and the income derived from them, can fall as well as rise. Investors may get back less than invested. Performance is calculated on a Total Return basis using a notional portfolio in Financial Express Analytics. Performance is net of Charles Stanley Investment Management fees but not adviser fees nor platform costs. Any charges and fees applied by platforms and/or authorised intermediaries will be charged in addition. Past performance is not a reliable guide to the future. Total Ongoing Charges Figure (TOC) is calculated on a periodic basis using a weighted average of the most recent publicly available TOC for the underlying investments as at the date of the factsheet. This includes the underlying funds' Ongoing Charges Figure plus Transactional Costs plus Incidental Costs. Please note that whilst we endeavour to show all charges associated with specific funds, sometimes this is not possible due to the information not being made available by the fund provider. In such cases transaction or incidental cost information may be missing. Portfolios linked to this Model Portfolio may not exactly replicate the model due to the difference in timing of initial investment or rebalancing differences resulting from minimum transaction size limits on platforms. The management and rebalancing of this Model Portfolio does not take Capital Gains Tax into consideration.
