

EPIM Cabot Moderately Cautious

Investment objective and policy

These discretionary managed model portfolios offer risk-profiled investment solutions, all of which have a dynamic top-down asset allocation strategy implemented using low cost index tracking funds.

The investment objective for the EPIM Cabot Moderately Cautious Model Portfolio is to provide a long-term total return which is superior to inflation plus 1% returns. The performance of the model portfolio is not intended to track the rise (or fall) of any specific index.

Key facts

Inception Date	30/09/2012
Typical Growth / Defensive Split	30:70
Annual Management Charge	0.20%
Total Ongoing Charges (of underlying funds)	0.14%
Portfolio Total Ongoing Charge	0.34%

US equities continued to surge in June, with some in-line inflation results easing market concerns that disinflationary trends were diminishing. The technology sector continued to lead the gains, with Nvidia, Apple and Microsoft jostling in a three-horse race for the title of the world's most valuable company. There were signs that the US consumer is finally showing signs of slowing – which is very welcome news for the Federal Reserve. May retail sales numbers were weak and accompanied by downward revisions to the previous month's data. US treasury yields remained high as the US central bank remains cautious about an early interest rate cut given the stickiness of inflation. The market has substantially lowered expectation for a September cut following a stronger-than-expected May payroll report.

The European Central Bank became the first major central bank to cut interest rates, its first reduction in almost five years. However, President Christine Lagarde remained vague about the future pace of interest rate cuts. The central bank cautioned that it expected inflation to remain above its 2% target until late 2025. This was more hawkish than the market expected. European equities were hit after French President Emmanuel Macron called a surprise election following a poor performance in the European elections. The situation backfired and Marine Le Pen's far right National Rally won the first round of voting.

UK equity markets were weak, hit by its exposure to oil. Gilt yields fell on expectations of a summer interest rate cut, although market expectations of an August rate cut have eased. Japanese equities moved higher, as the yen fell to a 34-year low against the dollar. The Nikkei 224 was boosted by technology names and exporters.

Valuations in equity markets remain elevated and growth is slowing due to the impact of high interest rates. The second-quarter earnings season, which starts in late July, will need to see companies deliver expectations if the rally is to be maintained.

Important Information

Certain information ©2023 MSCI ESG Research LLC. Reproduced by permission

The value of investments, and the income derived from them, can fall as well as rise. Investors may get back less than invested. Returns may be affected by currency exchange rate fluctuations.

Performance is calculated on a Total Return basis using a notional portfolio in Financial Express Analytics. Performance is net of Eden Park Investment Management fees but not adviser fees nor platform costs. Any charges and fees applied by authorised intermediaries will be charged in addition to the charges shown. The Total Ongoing Charges Figure (TOC) is calculated by Financial Express Analytics using a weighted average of the underlying investments and represents underlying Ongoing Charges Figure plus Transaction costs plus Incidental costs for those holdings. Portfolios linked to this Model Portfolio may not exactly replicate the model due to the difference in timing of initial investment or rebalancing differences resulting from individual portfolio circumstances. The management and rebalancing of this Model Portfolio does not take Capital Gains Tax into consideration.
