

EPIM Cabot Moderately Cautious

Investment objective and policy

These discretionary managed model portfolios offer risk-profiled investment solutions, all of which have a dynamic top-down asset allocation strategy implemented using low cost index tracking funds.

The investment objective for the EPIM Cabot Moderately Cautious Model Portfolio is to provide a long-term total return which is superior to inflation plus 1% returns. The performance of the model portfolio is not intended to track the rise (or fall) of any specific index.

Key facts

Typical Growth / Defensive Split	30:70
Annual Management Charge	0.20%
Total Ongoing Charges (of underlying funds)	0.14%
Portfolio Total Ongoing Charge	0.34%

Equity markets slipped in March as investors sought clarity on the scope and impact of Donald Trump’s tariff strategy. European equity indices fared better than those in the US, amid rotation by investors from Wall Street where valuations are rich and economic uncertainty prevails. Emerging market shares outperformed developed markets.

Weakness in US equity markets was sparked by investor worries over the effect of Donald Trump’s tariff strategy on the country’s economy following some weak survey data. This lack of visibility was compounded by some surprise announcements by the US president, including the introduction of a blanket 25% duty on US vehicle and auto-part imports.

Washington is expected to announce a raft of “reciprocal” tariffs on 2 April. These are expected to vary country by country. Treasury Secretary Scott Bessent said efforts were focused on the “Dirty 15” – the 15% of countries that account for the bulk of trade with the US and impose tariffs or other rules that put US companies at a disadvantage.

As expected, the US Federal Reserve held its key interest rate steady at 4.25% to 4.50%. Its Federal Open Markets Committee (FOMC) downgraded its outlook for economic growth and moved its inflation projection higher. Members of the FOMC indicated in their “dot plot” that they continue to see two further interest rate cuts in 2025, and markets expect them to engineer a soft economic landing. Treasury yields rose over the month.

Market participants also focused on geopolitics, as US-brokered ceasefire negotiations between Ukraine and Russia stalled. The talks were aimed at securing a 30-day pause in the targeting of energy infrastructure, while a more comprehensive deal was hammered out. However, Russian leader Vladimir Putin said there would be preconditions to any ceasefire, angering President Trump.

The defence sector has been a major beneficiary of President Trump’s new policies as he attempts to pressure Nato members into increasing their spending in this area. The fourth-quarter earnings season was generally supportive of equity markets, but companies that issued disappointing guidance saw valuations hit hard.

Important Information

Certain information ©2023 MSCI ESG Research LLC. Reproduced by permission

The value of investments, and the income derived from them, can fall as well as rise. Investors may get back less than invested. Returns may be affected by currency exchange rate fluctuations.

Performance is calculated on a Total Return basis using a notional portfolio in Financial Express Analytics. Performance is net of Eden Park Investment Management fees but not adviser fees nor platform costs. Any charges and fees applied by authorised intermediaries will be charged in addition to the charges shown. The Total Ongoing Charges Figure (TOC) is calculated by Financial Express Analytics using a weighted average of the underlying investments and represents underlying Ongoing Charges Figure plus Transaction costs plus Incidental costs for those holdings. Portfolios linked to this Model Portfolio may not exactly replicate the model due to the difference in timing of initial investment or rebalancing differences resulting from individual portfolio circumstances. The management and rebalancing of this Model Portfolio does not take Capital Gains Tax into consideration.
